### PROJECT

#### • **React( Flat Management System )**

Utilized React.js for a Flat Management System, enhancing property management efficiency. Usage of Flat Management System using React: Developed a user-friendly system, prioritizing seamless communication and task management. Leveraged React components, Hooks, and Router for intuitive user interfaces and responsive design, ensuring accessibility across devices. Demonstrated expertise in React.js while prioritizing functionality and user experience.

#### • **React Portfolio**

Create an engaging and interactive portfolio website using React.js to showcase my skills, projects, and experiences effectively. The portfolio will serve as a comprehensive representation of my expertise in frontend development, with the aim of demonstrating creativity, technical proficiency, and a strong attention to detail.
